PROFESSIONAL SUMMARY

Cloud Engineer with 2+ years of hands-on experience in Terraform, CI/CD pipelines, multi-account architectures, and serverless solutions, delivering cost-optimized and compliant environments for life sciences and healthcare.

PROFESSIONAL EXPERIENCE

System Analyst | Stratogent Technology Services

July 2023 – Present

- Designed and deployed AWS multi-account infrastructure using Control Tower and Account Factory for Terraform (AFT), establishing landing zones with custom guardrails, tagging policies, and SCPs
 - Automated infrastructure provisioning with Terraform and GitHub Actions CI/CD pipelines
 - Delivered complex AWS solutions including nested VPCs, Transit Gateway, PrivateLink, and highly available application workloads
 - Implemented cost optimization initiatives resulting in 30% savings through Trusted Advisor
 - Automated operational tasks such as cost reporting, backups, and compliance checks using serverless architectures
 - Provisioned and managed infrastructure for internal and external websites using CloudFront, API Gateway, Lambda, and S3
-

SELECTED PROJECTS

AWS Terraform Import & State Management

- Led enterprise-wide Terraform migration initiative, successfully importing existing AWS infrastructure across 5 production accounts into Infrastructure as Code
- Architected modular Terraform repository with reusable modules for VPC, compute, security, and application layers
- Implemented automated drift detection, GitHub Actions CI/CD pipelines, and remote state management using S3 and DynamoDB

Data Sync Data Transfer Automation

- Designed and deployed a bi-directional automated data synchronization solution between on-premises file servers and AWS S3 across multiple facilities
- Engineered end-to-end automation pipeline using AWS DataSync, Lambda, EventBridge, Storage Gateway, and Systems Manager
- Implemented automated validation, cleanup workflows, and comprehensive monitoring with CloudWatch alarms and SNS notifications

Secure CRO Data Transfer Solution with Malware Scanning

- Designed and implemented a secure SFTP file transfer solution for Contract Research Organization (CRO) with automated malware scanning
 - Built event-driven architecture with GuardDuty, Lambda, EventBridge, SQS, and SNS for real-time malware detection and intelligent file routing
 - Automated cleanup workflows and compliance reporting using scheduled EventBridge rules for secure and auditable data transfers
-

CERTIFICATIONS

AWS Certified Solutions Architect – Associate | HashiCorp Certified: Terraform Associate | AWS Well-Architected Proficient

EDUCATION

Bachelor of Engineering in Electrical and Electronics

Sir M. Visvesvaraya Institute of Technology | 2019 - 2023

CGPA: 8.7/10
